PERSONAL PROTECTIVE EQUIPMENT (PPE)

Safeguarding individuals through vital Personal Protective Equipment (PPE) usage.

MEDICAL EQUIPMENTS & ACCESSORIES:

APRON FOR DOCTOR

Aprons are essential for doctors as they provide protective barrier against contaminants and fluids, ensuring a safe and hygienic working environment during medical procedures.

SYRINGE

Syringes are medical instruments used to administer precise dosages of medications or extract fluids from the body, playing a crucial role in accurate medical treatments and diagnostics.

SURGICAL MASK

Surgical masks are worn by healthcare professionals to prevent the spread of airborne pathogens, ensuring aseptic conditions during medical procedures and safeguarding both patients and practitioners.

STETHOSCOPE

Stethoscopes are indispensable tools for healthcare providers, enabling them to listen to internal body sounds and diagnose various medical conditions such as heart and lung abnormalities with precision.

MEDICAL EQUIPMENTS & ACCESSORIES:

OXYGEN MASK

Oxygen masks are essential medical devices that deliver supplemental oxygen to patients with respiratory issues, ensuring proper oxygenation and supporting their respiratory function.

EYE CHART

Used by eye care professionals to assess and measure a person's visual clarity and acuity, aiding in the prescription of corrective lenses and the diagnosis of vision problems.

RESUSCITATOR

Employed in emergency medical situations to provide manual ventilation to individuals who are not breathing adequately, helping to deliver oxygen and maintain oxygenation until more advanced care can be administered.

STRETCHER

Stretchers are crucial medical equipment used for safely transporting injured or ill patients, ensuring their stability and comfort while being moved within healthcare facilities or during emergencies.
